

Story Y05: Zoekfunctie Work Orders.

I want to be able to find what work orders are going on on what date.

Wireframes:

The wireframe illustrates the layout of the 'Work Order Overview' page. It features a top navigation bar with 'Home' and 'Work Orders' links. Below the navigation, the page title 'Work Order Overview' is displayed. A table lists four work orders: 'Work Order 1', 'Work Order 2', 'Work Order 3', and 'Work Order 4'. At the bottom, there is a search section with a 'Date Input' field and a 'Find' button.

Home	Work Orders
Work Order Overview	
Work Order 1	
Work Order 2	
Work Order 3	
Work Order 4	
Date Input	Find

Acceptance Criteria:

- From the Work Order Overview page I should be able to insert a date I want to search.
- After clicking the find button and thus submitting the form I should be able to see the work orders that fit the date I inserted.

Technical Criteria:

- When inserting a date that doesn't match any work orders, I don't leave the page and my filled in information stays the same.
- The find button doesn't change any of the work orders in the table itself.
