

# Story Y04: Sort function Work Order.

I want to be able to sort the Work Order overview table by date.

Wireframes:

The wireframe shows a page layout for 'Work Order Overview'. At the top, there are two navigation buttons: 'Home' and 'Work Orders'. Below them is the section title 'Work Order Overview'. Under the title is a table with five rows: 'Table Head', 'Table Row 1', 'Table Row 2', 'Table Row 3', and 'Table Row 4'. At the bottom left of the page is a 'Sort' button.

Home	Work Orders
<b>Work Order Overview</b>	
Table Head	
Table Row 1	
Table Row 2	
Table Row 3	
Table Row 4	
Sort	

Acceptance Criteria:

- From the Order Overview page I should be able to navigate to a page where I can choose to sort the information
- After submitting the form I should be able to see the same information except in a sorted table.

Technical Criteria:

- The sort button should take me to a page with a form to specify on how specifically to sort the data.
